Release Notes – New UI Only:

#	Enhancements
1	<p>Application Performance has been improved in the following areas:</p> <ol style="list-style-type: none"> 1. Loading two-frame screens, such as Job Template Library 2. Opening Job Folders
2	<p>Masking of field value from users:</p> <p>Administrators can now add a "protected_" prefix to any custom candidate field label on the Administration Candidate Profile page to mask the value of the field from users.</p> <ol style="list-style-type: none"> 1. Click Candidate Profile, under the Mappings section of the Administration tab 2. In the Field label, add "protected_" as a prefix 3. Values entered in this field by users/candidates will be masked on the Candidate Profile screen <p>Please connect with your Account Manager before using this functionality. UAT testing will be required.</p>
3	<p>Date picker field:</p> <p>The date picker field on various pages of the application (such as the job requisition page) now allows users to select a date earlier than 10 years back.</p>
4	<p>PreCheck – Screening included in background check request:</p> <p>Candidate Screening Questions can now be submitted to PreCheck as part of the background check request candidate data.</p> <p>This feature is only applicable if you are using PreCheck. Please connect with your Account Manager if you wish to have this feature enabled. UAT testing will be required.</p>

5	<p>Change of Update Application text in applicant emails:</p> <p>"Click here to update your profile" has been changed to "Click here to update your application"</p>
---	---

#	Defects
1	<p>Job Search – Refine Search clears previous settings:</p> <p>On running the job search, then clicking Refine Search, the previous settings entered should still be selected.</p>
2	<p>Hire/Unhire through the Job's More actions:</p> <p>Where there are multiple candidate folders under a job, a message now lets the user know that specific folder(s) need to be selected in order to complete the hire/unhire action.</p> <ol style="list-style-type: none"> 1. Select a job with multiple candidate folders 2. Click Hire/Unhire under the job's More menu 3. Complete all mandatory fields on the screen 4. Click the Hire button <p>A pop up should display asking you make a candidate folder selection.</p>
3	<p>Hire/Unhire screen in Chrome:</p> <p>This screen should now open directly to full size.</p>
4	<p>Change of Referral Amount text on Hire/Unhire screen:</p> <p>"Referral Amount" has been changed to "Bonus Amount"</p>

5	<p>Job/Candidate status folders fail to open when logged into multiple accounts:</p> <p>Users with multiple accounts should now be able to log in to those simultaneously.</p>
6	<p>Job Redflag/Unflag to all job's candidates:</p> <p>Redflag/Unflag now appears as an option under the Candidate actions section of the Job's More window.</p>
7	<p>Mandatory field highlighting on preview screens:</p> <p>Mandatory field highlighting is fixed on the Administration, Job Requisition and Candidate Profile preview screens.</p>
8	<p>Upload attachment maximum size on email candidate/user:</p> <p>Users can now upload attachments on the Email Candidate and Email User screens totaling up to 10MB in size.</p>
9	<p>Some issues are resolved with copying of Letter WebForms.</p>
10	<p>Quick Status Update saving issue in Other Users Jobs:</p> <p>Under the Other Users view, switching between one user's jobs and another without closing the first user's folder used to cause the Save button on the candidate Status Update field to be hidden. This is now resolved.</p> <ol style="list-style-type: none"> 1. Go to the Other Users view 2. Click on a user's folder 3. Select a job, then select a candidate 4. Scroll down on the Other Users view page without closing out of the candidate profile and select another user's folder 5. The Status field Save button at the top of the Candidate Profile page should display

11 **Global Preferences Preview:**

The Global Preferences Preview window's scroll bar placement has been adjusted.
